DATA STANDARDS CHANGE NOTICE

A Data Standards Change Notice (DSCN) is an information mandate for a new or revised information standard.

This Data Standards Change Notice (DSCN) was approved by the Welsh Information Standards Board (WISB) at its meeting on Thursday 18th September 2025.

WISB Reference: ISRN 2025/003

Summary:

To introduce a new data set for Single Point of Contact (SPOC), to facilitate a standardised list of data items and values sets for national reporting requirements.

Data sets / returns affected:

N/A

Please address enquiries about this Data Standards Change Notice to the Data Standards Team in Digital Health and Care Wales

E-mail: data.standards@wales.nhs.uk

The Welsh Information Standards Board is responsible for appraising information standards. Submission documents and WISB Outcomes relating to the approval of this standard can be found at:

DATA STANDARDS CHANGE NOTICE

Introduction

The [3Ps Policy: Promote, prevent and prepare for planned care](#) was co-produced with key stakeholders and announced by the Minister for Health & Social Care in August 2023.

As part of this policy, Welsh Government mandated that all Health Boards establish a Single Point of Contact (SPOC) service to provide patients with tailored information, advice, and support related to planned care. To evaluate the effectiveness and justify financial investment in SPOC services, Welsh Government requires a new patient-level dataset capturing SPOC activity (e.g., total calls by Health Board and specialty, service outcomes, and patient contact frequency).

In January 2024, the Welsh Information Standards Board (WISB) appraised the initial Requirement Notification, with a Development Proposal approved by the Welsh Information Development Group (WIDG) in February 2024. These documents set out the need for a patient-level dataset.

However, discussions with Digital Health and Care Wales (DHCW) and the National Data Resource (NDR) team confirmed that implementing this via the National Data and Analytics Platform (NDAP) was not feasible in the required timeframe. The Switching Service was also ruled out due to its end-of-life status.

As a result, the work was split into two phases:

- Phase 1 – Aggregate Data Collection (interim solution during development of the Data Standards Change Notice).
- Phase 2 – Patient-Level Dataset (sustainable long-term solution).

Since Health Boards were already progressing with local SPOC services, interim aggregate data collection was recommended to capture early activity and assess patient and service benefits until the full patient-level dataset is implemented.

Description of Change

To create a new patient-level data set that records the activities carried out within the Single Point of Contact (SPOC) service within Health Boards.

Data Dictionary Version

The current release: version 4.25 of the NHS Wales Data Dictionary will be the final version published on the existing platform.

The NHS Wales Data Dictionary will be moved to a new and improved platform.

In the interim, please visit [DHCW Data Standards](#) to access notice publications or contact data.standards@wales.nhs.uk

Actions Required

Local Health Boards / Trust:

- Update local processes and systems to comply with the information outlined within this DSCN.
- To collaborate with DHCW Data Acquisition team to agree and establish processes for data submission in preparation for collection.

Digital Health and Care Wales:

- Ensure that all national systems have been updated to comply with the standard set out in this DSCN.
- Data Acquisition team to coordinate with each Health Board/Trust individually to discuss the details of data submission and offer any necessary support.
- Data Quality team to co-ordinate with the Data Acquisition team to produce the logic and associated documentation for data set validation checks.

Appendix A: Table reflecting areas that are impacted as a result of this DSCN

The following table shows where there are changes to the scope and/or definitions of applicable data sets, data items, terms and other associated areas that are linked with the changes documented within this Data Standards Change Notice (DSCN).

Key:

- **New:** The creation of a new data item not already in the NHS Wales Data Dictionary
- **Retired:** The entire data item is no longer in use in the NHS Wales Data Dictionary.
- **Changed:** An existing data item on the NHS Wales Data Dictionary has been modified this includes a change to the definition or its value set.
- **Existing:** The inclusion of a data item in a standard that is already on the NHS Wales Data Dictionary, but no changes have been made to its definition or value set.

Data Definition Type	Name	New/Retired/Changed/Existing	Page Number

Data Item	Local Patient Identifier	Existing	24
Data Item	Treatment Function Code	Existing	25

Appendix B: Highlighted changes to be made to the NHS Wales Data Dictionary

Changes to the NHS Wales Data Dictionary are detailed below, with new text being highlighted in **blue** and deletions are shown with a ~~strikethrough~~. The text shaded in **grey** shows existing text copied from the NHS Wales Data Dictionary.

Return Submission Details

For the Single Point of Contact (SPOC) data set, returns should be submitted by 12:00pm/midday on the 7th working day of each month. If the 7th falls on a weekend, the deadline for submissions is the next available working day.

The DHCW Data Acquisition team will liaise with the Health Boards/Trusts to discuss data submission details and provide any necessary support.

Scope

The Single Point of Contact (SPOC) data set captures specific communications with patients collected at the point of referral and once added to a waiting list, via the SPOC service. This encompasses inbound and outbound calls, emails, and contact through Patient Portals, along with the associated outcomes of these contacts. Capturing this data serves as a key mechanism for enhancing patient engagement, providing timely guidance, and managing clinical risks associated with delays in care.

The SPOC data set is intended to support the implementation of the [3Ps Policy: Promote, Prevent, and Prepare for Planned Care](#) —a strategy focused on reducing lost capacity and improving outcomes for patients accessing planned care services. The policy encourages a shift from passive waiting to active preparation, underpinned by effective communication, support for self-management, and holistic patient care.

Exclusions:

This data set does **not** include activities related to waiting list validation purposes (e.g. calls or contacts made solely for this purpose, or generic communications such as mass emails, letters, text messages, website page visits, or distribution of non-personalised materials like leaflets).

Data Items

A) New Data Items

Mode of Contact

This data item is / was included in the following data sets / collections between the dates shown:

Data Set / Collection	Valid From	Valid To
SPOC ds	1 st April 2026	

The specific method used to communicate or connect with someone.

Format: 2 digit numeric

Value	Meaning	Description	Valid From	Valid To
01	Inbound call	Telephone call received by the service from a patient (or their carer), who is waiting for secondary care treatment.	1 st October 2025	
02	Outbound call	Telephone call made by the service to a patient (or their carer), who is waiting for secondary care treatment.	1 st October 2025	
03	Email	Email sent to or received from a patient (or their carer) by the service, who is waiting for secondary care treatment.	1 st October 2025	
04	Patient Portal	Communication via the messaging function within a Patient Portal. For example, using a patient portal like Patient Knows Best (PKB).	1 st October 2025	

Contact Outcome

This data item is / was included in the following data sets / collections between the dates shown:

Data Set / Collection	Valid From	Valid To
SPOC ds	1 st April 2026	

The outcome of the contact with the patient.

Format: 2 digit numeric

Value	Meaning	Description	Valid From	Valid To
01	Escalated due to Safeguarding concerns	Escalated due to Safeguarding concerns.	1 st October 2025	
02	Escalated for Clinical Validation	Where a clinical decision is required to manage the patient's pathway which can include when a patient is requesting to be removed from a waiting list, has declined treatment, has been treated elsewhere, or when treatment is no longer required.	1 st October 2025	
03	Escalated to Specialty - Pathway concern	Escalated to Specialty for a pathway concern/or query regarding place on the waiting list, waiting times, treatment times etc.	1 st October 2025	
04	Escalated to Specialty for a Clinical concern	Escalated to Clinician within Specialty relating to the patient's clinical condition e.g. concerns/red flags identified related to referred condition. Clinicians include Consultants, Specialist Nurse, Specialist Allied Health Professionals.	1 st October 2025	
05	Escalated Internally to Nurse/Clinical Lead	Nurse/Clinical Lead within the service team.	1 st October 2025	

06	General Health and Condition Management Advice Given	General advice given on managing the patient's condition/symptoms. This would include advice on screening and immunisation.	1 st October 2025	
07	GP - Deterioration of general health, condition, or a new health concern	Refer/signpost to GP for further action/management e.g. For symptoms not associated with the patients referred condition or for pain review for deterioration and increase in pain.	1 st October 2025	
08	Link to Digital Health Apps Sent	Approved digital apps e.g. Self-Management of condition, Health promotion, Smoking cessation etc.	1 st October 2025	
09	Making Every Contact Count (MECC) Conversation	Making Every Contact Count Conversation (Making Every Contact Count - Public Health Wales).	1 st October 2025	
10	Medication Review with Pharmacist	Refer/Signpost to Pharmacist for medication review.	1 st October 2025	
11	Patient declined support	Support was offered, but the patient declined.	1 st October 2025	
12	Patient Reported Outcome Measures (PROM) completed	Patient Reported Outcome Measures (PROM) completed with patient.	1 st October 2025	
13	Primary Care Other	E.g. Optometrist, Dentist, Pharmacist etc.	1 st October 2025	
14	Refer to Occupational Therapy service	Refer to Occupational Therapy, e.g. this will include an Occupational Therapist external to the service team rather than a clinical lead Occupational Therapist.	1 st October 2025	
15	Refer to Patient Advice and Liaison Service (PALS)	Refer to Patient Advice and Liaison Service (PALS).	1 st October 2025	
16	Refer to Self-Management Programme	Refer to Self-Management Programme, E.g. Education Programmes for Patients (EPP), Escape Pain etc.	1 st October 2025	
17	Refer/signpost to Third Sector	Refer/signpost to charities relevant to the patient's condition/needs e.g. Local Community Support Groups.	1 st October 2025	
18	Refer/signpost to 999/Medical Emergency as Red Flag	Refer/signpost to 999/Medical Emergency as Red Flag.	1 st October 2025	
19	Refer/signpost to Drugs & Alcohol services/resources	Refer/signpost to Drugs & Alcohol services/resources.	1 st October 2025	
20	Refer/signpost to Health Coaching	Refer/signpost to a Qualified Health Coach Practitioner Level 3 or above.	1 st October 2025	
21	Refer/signpost to Mental Health Services or resources (GP, 111, CRISIS, online resources etc)	Refer/signpost to Mental Health Services or resources (GP, 111, CRISIS, online resources etc) as per Mental Health escalation process.	1 st October 2025	
22	Refer/signpost to Optimisation & Prehabilitation services	Refer/signpost to Early Optimisation & rehab team e.g. Orthopaedic Prehabilitation Programme or NERS (National Exercise Referral Scheme).	1 st October 2025	

23	Refer/signpost to other Therapies	E.g. Dietitian, Podiatrist, Talking Therapies (counselling) etc.	1 st October 2025	
24	Refer/signpost to Physiotherapy service	Refer/signpost to Physio service, e.g. this will include a Physio service external to the team rather than clinical lead Physio.	1 st October 2025	
25	Refer/signpost to Smoking Cessation	Refer/signpost to Smoking Cessation services or resources including digital.	1 st October 2025	
26	Refer/signpost to Social Care/Local Authority	Refer/signpost to Social Care/Local Authority e.g. supported home care.	1 st October 2025	
27	Refer/signpost to Weight Management services/resources	Refer/signpost to Weight Management services/resources.	1 st October 2025	
28	Signposted to Online Waiting Well Resources	Signposted to Online Resources e.g. Health Board Waiting Well landing pages or other websites relating to the patients' health and wellbeing needs.	1 st October 2025	
29	Signed up to Health Board Patient Facing Portal	Signed up to Health Board Patient Facing Portal e.g. Patient Knows Best (PKB).	1 st October 2025	
30	Unable to contact patient	Unable to contact the patient.	1 st October 2025

This is the organisation code of the health care provider. The provider code identifies the health care provider who is responsible for managing the treatment of the patient.

Notes:

1. Healthcare providers may also act as commissioners when sub-contracting patient care services to other providers of health care.
2. Although the healthcare provider identified in this data item is responsible for managing the patient's treatment, it may not necessarily be where the treatment is actually conducted. For example, where the treatment has been sub-contracted to another healthcare provider.
3. For OPR ds, the Organisation Code (Code of Provider) is that of the organisation receiving the referral. If the provider is a Local Health Board/Trust, use the 3 character Local Health Board/Trust code with 2 zeros placed in the 4th and 5th character position.
4. For Referral to Treatment Times (Combined), use the 3 character Local Health Board/Trust code.

Format:

For Patient Level Data Sets (*APC, OP, CC, OPR, PAP, RTDS*):-

5 character alpha-numeric Local Health Board/Trust Code with 2 zeros placed in the 4th and 5th character position.

For Aggregate Data Collections (*DATS and RTT (Combined)*):-

3 character alpha numeric Local Health Board/Trust Code

Value	Meaning
XAABB	The organisation code for the provider

Default codes:

The NHS number is the primary identifier of a person, and is a unique identifier for a patient within the NHS in Wales.

It is mandatory to record the NHS Number

- (in the MI ds) for each woman and baby
- (in every other data set) for each patient registered with a GP practice in England and Wales.

The NHS number is allocated to an individual, to enable unique identification for NHS health care purposes.

The MI ds captures data relating to the woman at initial assessment and to mother and baby for all births. Each Health Board makes data available in relation to the events which they managed, and initial assessment and birth data will be linked nationally regardless of whether both events took place in the same or at different health boards. The NHS number is needed on each record to enable this data to be linked.

This NHS Number format was mandated for use effective 1st November 1997. Prior to this, the NHS Number was an alphanumeric code which ranged in size from 10 – 17 characters.

If known, the patient's Health and Care Number should be used to populate this field for patients resident in Northern Ireland.

If known, the patient's Community Health Index (CHI) Number should be used to populate this field for patients resident in Scotland.

Format: 10 digit numeric

See [Health and Care Number](#)

See [Community Health Index \(CHI\) Number](#)

Check Digit Algorithm

(This algorithm applies to the Welsh and English NHS Number and the Northern Ireland Health & Care Number. The check digit algorithm for the Scottish CHI Number is available on request from the NHS Wales Informatics Service.)

Step 1 Multiply each of the first nine digits by a weighting factor as follows:

Digit Position (starting from the left)	Factor
1	10
2	9
3	8
4	7
5	6
6	5
7	4
8	3
9	2

Step 2 Add the results of each multiplication together

Step 3 Divide the total by 11 and establish the remainder

Step 4 Subtract the remainder from 11 to give the check digit

Step 5 Check the remainder matches the check digit. If it does not, the number is invalid.

If the result of Step 4 is 11 then a check digit of 0 is used

If the result of Step 4 is 10 then the number is invalid and not used

Patient's Name

This data item is / was included in the following data sets / collections between the dates shown:

National Cancer Ds - Core		
WECDS	1 st August 2024	
AUD WT ds	1 st April 2025	
SPOC ds	1 st April 2026	

This will be the patients preferred name. The patient is the arbiter of his/her/their name.

Format: either structured with two 35 alpha character elements (forename followed by surname) or an unstructured string of 70 characters. Use block capitals, ignore apostrophes and insert space for hyphen. Enter surname first then as many letters of the first name as possible, leaving a blank box between each part of the name. Double-barrelled surnames should be coded in the same order as in the hospital records. [Name Format Code](#) indicates which format is being used.

Patient's Usual Address

This data item is / was included in the following data sets / collections between the dates shown:

Data Set / Collection	Valid From	Valid To
APC ds99	1 st April 1999	
EAL ds	1 st April 1999	21 st November 2012

WECDs	1 st August 2024	
AUD WT ds	1 st April 2025	
RTT weekly PTL ds	1 st April 2025	
SPOC ds	1 st April 2026	

This is the usual address:

- (in the SCPC ds) for the patient at the Pathway Start Date (Point of Suspicion of Cancer)

- (in every other data set listed above) nominated by the patient at the time of admission or attendance. If patients usually reside elsewhere are staying in hotels, hostels or other residential establishments for a short term, say a week, they should be recorded as staying at their usual place of residence. However if long term, such as at boarding school, the school address must be recorded. University students may nominate either their home address or the address of their university accommodation. Where patients are not capable of supplying this information, because of age or mental illness, for example, then the person responsible for the patient, such as a parent or guardian, should nominate the usual address. Patients not able to provide an address should be asked for their most recent address. If this cannot be established then you should record the address as `No fixed abode' or `Address unknown'. These patients are regarded as resident in the local geographical district for contracting purposes. For birth episodes this should refer to the mother's usual place of residence.

- For RTT PTL data set: This relates to the patient's current address at the time of reporting.

Format: 175 character alpha-numeric. This is based on 5 lines of 35 characters. This relates to the physical layout of the address, not the logical layout and does not require intelligent intervention when splitting the text string into lines.

Prior to April 1999 the PEDW Format: 100 character alpha-numeric. This is based on 4 lines of 25 characters. This relates to the physical layout of the address, not the logical layout.

The code assigned by Royal Mail to identify postal delivery areas across the United Kingdom.

This is the usual address

- (in the SCPC ds) for the patient at the Pathway Start Date (Point of Suspicion of Cancer)
- (in every other data set listed above) nominated by the patient at the time of admission or attendance

Format: 8 character alpha-numeric. This allows a space to be inserted to differentiate between the inward and outward segments of the code, enabling full use to be made of the Royal Mail postcode functionality.

Organisation Data Service rules apply.

If a patient has no fixed abode, this should be recorded with the appropriate code (ZZ99 3VZ).

For overseas visitors, the postcode field must show the relevant country pseudo postcode commencing ZZ99, plus spaces followed by a numeric, then an alpha character, then a Z. For example, ZZ99 6CZ is the pseudo-postcode for India. Pseudo-postcodes can be found in the NHS Postcode Directory.

See [Postcode](#)

(PEDW (Prior to April 1999), Psychiatric Census)

The postcode applied to the usual address nominated by the patient at the time of admission or attendance, using rules supplied above and those in the NHS Postcode User Directory.

Format: 8 character alpha-numeric. The 5th position is always blank (Δ) and possibly the 3rd and 4th characters may be blank also.

(This data item was formerly known as 'Consultant Specialty Function Code' with the new title being implemented from 15th May 2006)

This is the specialty under which the patient will be or is treated. This may either be the same as the specialty function recorded as the consultant's main specialty or a different specialty function which will be the consultant's interest specialty function. Note that both the main specialty function and the interest specialty function should be based on one of the Royal College specialties.

For RTT PTL data set not all Treatment Function Codes are applicable, therefore please refer to the Welsh Government RTT guidance for the complete list.

For the Welsh Emergency Care Data Set (WECDS):

This is the Treatment Function Code of the service to which a patient is to be admitted following an attendance at an Urgent and Emergency Care service.

For Referral to Treatment Times (RTT) (Combined):

Diagnostic Services

- For pre-consultant referrals to a diagnostic service specified in the table below, a 'pseudo' Treatment Function Code of 998 (Diagnostic Services) should be used.
- Following a consultant referral, the wait for a patient referred to any diagnostic service should be captured using the Treatment Function Code of the referring specialty.

Allied Health Professional (AHP) Services

- For pre-consultant referrals to an Allied Health Professional (AHP) service specified in the table below, a 'pseudo' Treatment Function Codes of 999 (Allied Health Professional Services) should be used.
- Following a consultant referral:
 - Should clinical responsibility remain with the referring consultant, the Treatment Function Code should be that of the referring specialty.
 - Should clinical responsibility for patient care transfer to an AHP service specified in the table below a Treatment Function Code of 999 should be used.

Consultant Referrals

- For consultant referrals, a 'pseudo' Treatment Function Code should not be used.
- As per current RTT rules, the Treatment Function Codes above are not to be used for the reporting of Mental Health and Learning Disabilities Referral to Treatment Times.
