## DATA STANDARDS CHANGE NOTICE

### Introduction

OPCS-4 is the Office of Population, Censuses and Surveys Classification of Surgical Operations and Procedures (4th revision). This statistical classification translates into code, operations and surgical procedures that can be carried out on a patient during an episode of health care.

OPCS v4.9 is the latest version of this intervention classification to be published by the Clinical Classifications Service of NHS Digital.

On 8<sup>th</sup> October 2019 NHS Digital published Information Standards Notice DCB0084 Amd18/2019, to mandate OPCS v4.9 from 1st April 2020 in NHS England. This implementation timescale is endorsed by the Welsh Information Standards Board for NHS Wales.

### Actions Required

NHS Wales Informatics Service:

- Ensure affected national applications managed by NWIS, namely the Welsh Patient Administration System, CANISC and some instances of the 3M Medicode clinical coding encoding software, are upgraded to support the collection and reporting of OPCS 4.9 codes.
- Introduce the necessary processes and infrastructure to support the use and publication of OPCS v4.9 codes for data users.
  - Ensure all affected national data processing tools, systems and reports (such as the Validation At Source Service, Welsh Reference Data Service and all

clinical coding-based reports, including the associated reference data tables) are updated to reflect the implementation of OPCS v4.9.

- Provide all current Welsh clinical coders and information departments with access to either physical copies of the new OPCS Classification of Interventions and Procedures Version 4.9 Volume I - Tabular List and Volume II - Alphabetical Index manuals or access to the online OPCS-4 classifications [browser](#) or the Classifications [e-viewer](#).
- Provide all current Welsh clinical coders with access the new National Clinical Coding Standards: OPCS-4 (2020) reference manual.
- Ensure the Clinical Classifications and Business Intelligence teams work collaboratively to ensure all analyses are updated to reflect the introduction of OPCS v4.9.
- Develop materials to facilitate engagement with clinicians and other users to raise awareness of the updated classification in order to maximise the benefits of its introduction.

#### Local Health Boards / Trusts:

- Ensure that any 3<sup>rd</sup> party patient administration systems, other affected IT systems and any associated encoding systems (i.e. those not managed by NWIS) are upgraded to enable the capture and reporting of OPCS v4.9 codes, effective from 1<sup>st</sup> April 2020, i.e.
  - For the Admitted Patient Care data set, Finished Consultant Episodes (FCEs) with an Episode End Date on or after 1<sup>st</sup> April 2020.
  - For the Outpatient data set, attendances with an Attendance Date on or after 1<sup>st</sup> April 2020.
  - For the Radiotherapy data set, appointments with an Appointment Date on or after 1<sup>st</sup> April 2020.
- Ensure Clinical Coding and Information Departments work collaboratively to ensure all analyses are updated to reflect the introduction of OPCS v4.9.
- Engage with clinical and other relevant staff to raise awareness of the updated classification in order to maximise the benefits from its introduction.
- Any LHBs / Trusts using the READ coding system are responsible for ensuring that the mapping to OPCS incorporates the OPCS v4.9 classification.

#### Actions for Welsh Government:

- Ensure that advice is sought from clinical coding colleagues at NWIS if figures affected by OPCS changes.
