WELSH INFORMATION STANDARDS BOARD

	DSC Notice:	DSCN 2020/31
	Date of Issue:	10 th December 2020
Ministerial / Official Letter: N/A	Subject: National Cancer Data Standards for Wales – Systemic Anti-Cancer Therapy (SACT)	
Sponsor: Cancer Implementation Group (CIG) Welsh Government		
Implementation Date: With immediate effect (or as soon as practicable following necessary updates to ChemoCare). ¹		
DATA STANDARDS CHANGE NOTICE		
<p>A Data Standards Change Notice (DSCN) is an information mandate for a new or revised information standard.</p> <p>This DSCN was approved by the Welsh Information Standards Board (WISB) at its meeting on 19th November 2020</p> <p>WISB Reference: ISRN 2020 / 033</p>		
Summary: To introduce a new standard for cancer minimum reporting requirements for Systemic Anti-Cancer Therapy (SACT).		
Data sets / returns affected: N/A		
<p>Please address enquiries about this Data Standards Change Notice to the Data Standards Team in NHS Wales Informatics Service</p> <p>E-mail: data.standards@wales.nhs.uk / Tel: 02920502539</p>		
<p>The Welsh Information Standards Board is responsible for appraising information standards. Submission documents and WISB Outcomes relating to the approval of this standard can be found at:</p> <p>http://howis.wales.nhs.uk/sites3/page.cfm?orgid=742&pid=24632</p>		

¹ Timelines and processes for implementation will be progressed through the All Wales SACT Group.

DATA STANDARDS CHANGE NOTICE

Introduction

The original All Wales Cancer Minimum Reporting Requirements were mandated via Data Standards Change Notices (DSCNs) in 2011 for Core and Site Specific (<http://nww.nwisinformationstandards.wales.nhs.uk/empty-5>)

A revision of the existing all Wales Core Cancer Minimum Reporting Requirements together with the development of new Site/Patient Group Specific Cancer Minimum Reporting Requirements is necessary to ensure Wales has effective, efficient and timely world-class healthcare information to provide intelligence and the insight to drive healthcare service improvements.

A revised standard for Core was mandated through National Cancer Data Standards for Wales – Core (DSCN 2019/09) <https://dhw.nhs.wales/information-services/information-standards/data-standards/data-standards-files/data-standard-change-notices-docs/national-cancer-standards-spec/1-national-cancer-data-set-full-list-dscns-xlsx/>

Core data items should be collected for all cancers.

This Notice encompasses the site-specific cancer minimum reporting requirements for Breast. This should be used in conjunction with National Cancer Data Standards for Wales – Core (DSCN 2019/09).

Description of Change

This Standard covers the data items for Systemic Anti-Cancer Therapy (SACT), listed in NHS England Systemic Anti-Cancer Therapy (SACT) Data Set V 3.0.2, and additional items to reflect NHS Wales reporting.

Typically, within the DSCN we use a combination of 'strike through' and highlighted text to denote changes to the existing standard, however given that there have been a number of iterations of the COSD in England since the publication of the All Wales Cancer Minimum Reporting Requirements in Wales, for usability this practice has not been followed in this document.

Data Dictionary Version

Where applicable, this DSCN reflects changes introduced by DSCN and/or DDCN since the release of version 4.10 of the NHS Wales Data Dictionary.

Actions Required

Actions for the NHS Wales Informatics Service:

- To apply this Standard with immediate effect (or as soon as practicable following necessary updates to ChemoCare).
- Continue to make routine extracts available to the Welsh Cancer Intelligence and Surveillance Unit (WCISU) for the purpose of cancer registration via existing means.

Actions for Health Boards/Trusts:

Health boards are expected to continue with '**business as usual**' namely, to collect and report data using existing national systems, i.e. CaNISC, ChemoCare, PMS, WPAS, Cancer Tracking Module (Tracker 7) for the following:

- National Cancer Audits for Wales - a Tier 1 Welsh Government requirement
- Collection and reporting to the existing standards for cancer, the All Wales Core and Site-specific minimum reporting requirements (see <http://howis.wales.nhs.uk/sites3/page.cfm?orgid=769&pid=19419>)
- Collection and reporting of data required for Cancer Waiting Times and Single Cancer Pathway as per DSCNs issued.

From 2021 treatment providers will aim to supply treatment details, where possible, of the SACT data items held within their Chemocare system, until such time that a new e-prescribing solution for Wales is in use and will be able to collect and report the SACT data standard in full. Minimal setting changes with the current ChemoCare systems may be required to collect and report data as set out in this Standard. Timelines and processes for implementation of this data standard will be progressed through the All Wales SACT Group.

In conjunction with the above points for Health Boards/Trusts, it is also important to note that:

Interim changes are currently in development for WPAS and Cancer Tracking Module (Tracker 7) to support the single cancer pathway data collection.

That data continues to be entered into the CWT fields within CaNISC, as many standard reports rely on the completion of those data items in report logic. Such reports continue to be used for many reporting purposes including national audit submissions.

SPECIFICATION

Information Specification

The data items required for National Cancer Data Standards for Wales – Systemic Anti-Cancer Therapy (SACT) and their equivalent labels in SACT V3.0.2, where there is an equivalent, are listed below.

Where the specification cites **NHS Wales Data Dictionary**, please refer to the Dictionary for the relevant guidance i.e. definition, format or code list.

For consistency, all dates listed in the Specification are standardised as ccyyymmdd.

Where *D* is denoted in Status, this indicates that the information should be derived from another data item. This typically occurs with data items that are simply text representations of their code counterparts. Other Status codes are *M* (Mandatory), *R* (Required) – the data item should be recorded where applicable and *O* (Optional).
