## 1. Introduction

This document is supplementary to the All Wales Information Security Policy issued under the All Wales Information Governance Policy Framework and is maintained by Digital Health and Care Wales (DHCW) on behalf of all NHS Wales organisations.

## 2. Purpose

The purpose of the Policy is to set out the responsibilities of Primary Care Service Providers in relation to the security of the information they process. Processing broadly means collecting, using, disclosing, sharing, retaining or disposing of personal data or information.

These responsibilities include, but are not restricted to, ensuring that:

- All systems are properly assessed for security;
- The confidentiality, integrity, availability and suitability of information is maintained;
- All individuals as referenced within the scope of this policy are aware of their obligations.

This policy must be read in conjunction with relevant organisational procedures. Information must only be shared where there is a defined purpose to do so. Nothing in this policy will restrict any organisation from sharing or disclosing any information provided they have an appropriate legal basis for doing so. Any information sharing which involves Personal Data or business sensitive information must be transferred securely.

## 3. Scope

This policy applies to all staff of Primary Care Service providers.

The term 'staff' includes all health professionals, partners, employees, locums, students, trainees, secondees, volunteers, contracted third parties and any persons undertaking duties on behalf of the Primary Care Service Provider.

For the purpose of this policy 'Primary Care Service Providers', referred to in this policy as 'the Organisation' will include General Medical Practices, Pharmacies, Dentists and Optometrists commissioned to provide primary care services on behalf of NHS Wales.

It applies to all forms of information processed by Primary Care Service Providers; and covers all business functions and the information, information systems, networks, physical environment and relevant people who support those business functions.

For the purpose of this policy "confidential information" refers to all personal data as defined by the data protection legislation, and information subject to the Duty of Confidence such as confidential business information and information relating to living or deceased individuals.

## 4. Roles and Responsibilities

The Senior Responsible Person within the Organisation is responsible for ensuring the highest level of organisational commitment to this policy and the availability of resources to support its implementation and any associated legal requirements. Specific responsibilities may be delegated to the representative Data Protection Officer and other individuals who have responsibility for information governance within the organisation. See [Appendix A for Glossary of Terms](#).

In addition, they must ensure that all staff are aware of this policy understand their responsibilities in complying with the requirements of this policy and are up to date with mandatory information governance training. Breaches of the policy must be reported via local incident reporting processes and dealt with in line with the Organisation's Disciplinary Policy where appropriate.

The workforce must familiarise themselves with the policy content and ensure the policy requirements are implemented and followed within their own work area. Mandatory information governance training must be undertaken at least every two years.

## 5. Policy

### 5.1. User Access Controls

Access to information will be controlled on the basis of business requirements. System Managers will ensure that appropriate security controls and data validation processes, including audit trails, will be designed into application systems that store any information, especially personal data. The workforce has a responsibility to access only the information which they need in order to carry out their duties. Examples of inappropriate access include but are not restricted to:

- Accessing your own health record;
- Accessing any record of colleagues, family, friends, neighbours etc., even if you have their consent, except where this forms part of your legitimate duties;
- Accessing the record of any individual without a legitimate business requirement.

#### 5.1.1. Physical Access Controls

The Organisation is responsible for determining the security measures required based on local risk assessment. All staff are responsible for following these security measures and to ensure they maintain confidentiality and security at all times regardless of the setting (e.g. when working from home or working in the community).

Maintaining confidentiality in clinical areas can be challenging and the need to preserve confidentiality must be carefully balanced with the appropriate care, treatment and safety of the patient.

Where physical security measures exist, it must be ensured that they are employed at all times (e.g. filing cabinets must be locked, security doors and windows must be closed securely, blinds to secure areas closed). Access cards, PIN codes, keycodes, etc. must be kept secure and regularly changed as required.

The workforce must ensure a clear desk and clear screen when away from their work area ensuring that confidential information, in any format, is secure and not visible to anyone who is not authorised to access it.

All central file servers and central network equipment will be located in secure areas with access restricted to designated staff as required by their job function.

#### 5.1.2. Passwords

The workforce are responsible for the security of their own passwords which must be developed in line with NHS guidance ensuring they are regularly changed. Passwords must not be disclosed to anyone, and users must not allow anyone to access any work using their log-in details.

In the absence of evidence to the contrary, any inappropriate access to a system will be deemed as the action of the user. If a user believes that any of their passwords have been compromised, they must change them immediately.

NADEX passwords no longer expire therefore require a strong password to be set. However, if the workforce think anyone else might know their password it should be changed immediately.

### 5.1.3. Remote Working

NHS Wales and the Organisation recognise that there is a need for a flexible approach to where, when and how our workforce undertake their duties or roles. Handling confidential information outside of your normal working environment brings risks that must be managed.

Examples of remote working include, but are not restricted to:

- Working from home;
- Working whilst travelling on public/shared transport;
- Working from public venues (e.g. coffee shops, hotels etc.);
- Working at other organisations (e.g. NHS, local authority or academic establishments etc.);
- Working abroad.

As a control measure to mitigate risks involved in remote working, no member of the workforce will work remotely unless they have been authorised to do so. Remote working must not be authorised for anyone who is not up to date with mandatory training in information governance.

### 5.1.4. Staff Leavers and Movers

Managers will be responsible for ensuring that local leaving procedures are followed when any member of the workforce leaves or changes roles to ensure that user accounts are revoked / amended as required and any equipment and /or files are returned. Confidential information, including access to confidential information, must not be transferred to a new role unless authorised by the Organisation's Senior Responsible Person. The relevant checklist for leavers and movers must be completed in all cases.

### 5.1.5. Third Party Access to Systems

Any third-party access to systems must have prior authorisation, and where personal data is involved, authorisation must also be sought from the Organisation's Senior Responsible Person.

## 5.2. Storage of Information

All information stored on behalf of, or within the Organisation is the responsibility of that organisation. All software, information and programmes developed for the Organisation by the workforce during the course of their employment will remain the property of the Organisation.

Users are not permitted to use their personal devices or store confidential information on a personal device for the purpose of carrying out organisational business unless they have been explicitly authorised to do so in line with a documented organisational process (e.g. a Data Protection Impact Assessment).

All systems supported by the Organisation will be backed up as part of their backup regime. Unless specifically told otherwise this will not include information held on local hard drives, portable devices or removable media. Users must not store information on local drives (usually referred to as the C Drive). Exceptions to this may be for legitimate work purpose to a device that is encrypted.

### 5.3. Portable Devices and Removable Media

Whilst it is recognised that both portable devices and removable media are widely used throughout the Organisation, unless they are used appropriately, they pose a security risk to the NHS Wales and the Organisation.

Portable devices include, but are not limited to, laptops, tablets, Dictaphones®, mobile phones, cameras and some forms of medical devices.

All portable devices must utilise appropriate technical measures to ensure the security of all data.

Users must not attach any personal (i.e. privately owned) portable devices to any NHS organisational network without prior authorisation.

Removable media includes, but is not limited to, USB 'sticks' (memory sticks), memory cards, external hard drives, CDs / DVDs and tapes. Appropriate controls must be in place to ensure any information copied to removable media is encrypted.

### 5.4. Secure Disposal

For the purposes of this policy, confidential waste is any paper, electronic or other waste of any other format which contains personal data or business sensitive information.

#### 5.4.1. Paper

All confidential paper waste must be stored securely and disposed of in a timely manner in the designated confidential waste bins or bags; or shredded on site as appropriate. This must be carried out in line with local retention and destruction arrangements.

#### 5.4.2. Electronic

Any IT equipment or other electronic waste must be disposed of securely in accordance with local disposal arrangements. For further information, please contact your Organisation's Senior Responsible Person/Information Governance Lead.

#### 5.4.3. Other Items

Any other items containing confidential information which cannot be classed as paper or electronic records e.g. film x-rays, orthodontic casts, carbon fax/printer rolls etc, must be destroyed under special conditions. For further information, please contact the Organisation's Senior Responsible Person/Information Governance Lead.

### 5.5. Transporting and relocation of information

#### 5.5.1. Transporting Information

When information, regardless of the format, is to be physically transported from one location to another location, local procedures must be formulated and followed by staff to ensure the security of that information.

### 5.5.2. Relocating Information

When information, regardless of the format, is to be physically relocated to another location, local procedures must be formulated and followed by staff to ensure no information is left at the original location.

## 6. Training and Awareness

Information governance is everyone's responsibility. Training is mandatory for all staff providing NHS services and must be completed at commencement of employment and at least every two years subsequently.

Staff who need support in understanding the legal, professional and ethical obligations that apply to them should contact their Senior Responsible Person as appropriate.

## 7. Monitoring and Compliance

NHS Wales and the Organisation trusts their workforce; however, they reserve the right to monitor work processes to ensure the effectiveness of the service. This will mean that any personal activities that staff practice in work may come under scrutiny. NHS Wales and the Organisation respect the privacy of their staff and do not want to interfere in their personal lives however, monitoring of work processes is a legitimate business interest.

Staff should be reassured that NHS Wales and the Organisation take a considered approach to monitoring; however, they reserve the right to adopt different monitoring patterns as required. Monitoring is normally conducted where it is suspected that there is a breach of either policy or legislation. Furthermore, on deciding whether such analysis is appropriate in any given circumstances, full consideration is given to the rights of the employee.

Managers are expected to speak to staff of their concerns, should any minor issues arise. If breaches are detected an investigation may take place. Where this or another policy is found to have been breached, disciplinary procedures will be followed.

Concerns about possible fraud and or corruption should be reported to the appropriate Counter Fraud Team.

In order for the Organisation to achieve good information governance practice, staff must be encouraged to recognise the importance of good governance and report any breaches to enable lessons learned. They must be provided with the necessary tools, support, knowledge and training to help them deliver their services in compliance with legislation. Ultimately a skilled workforce will have the confidence to challenge bad information governance practice and understand how to use information legally in the right place and at the right time. This should minimise the risk of incidents occurring or re-occurring.

## 8. Review

This policy will be reviewed one year after implementation and every two years thereafter or more frequently where the contents are affected by major internal or external changes such as:

- Changes in legislation;
- Practice change or change in system/technology; or
- Changing methodology.

## 9. Equality Impact Assessment

This policy has been subject to an equality assessment.

Following assessment, this policy was not felt to be discriminatory or detrimental in any way with regard to the protected characteristics, the Welsh Language or carers.

| Aims and Brief Description  | The policy is the product of the review of the All Wales Information Security Policy. The policy will replace all local policies in this area.  |  |
| Which Director is responsible for this policy/service/scheme etc  | All Wales policy developed in conjunction with Health Boards/Trusts   |  |
| Who is involved in undertaking the EQIA   | Andrew Fletcher and EQIA Group  |  |
| Have you consulted with stakeholders in the development of this policy?   | <p>Yes. A sub group has developed this policy with a membership consisting of information governance leads and an OSSMB representative. IM&amp;T leads and the Wales Partnership Forum have been consulted.</p> <p>The NHS Wales Information Governance Management and Advisory Group have approved the text of this Policy. The policy will be approved by the Wales Information Governance Board.</p> |  |
| Does the policy assist services or staff in meeting their most basic needs such as; Improved Health, fair recruitment etc | Yes. The policy will provide consistency throughout NHS Wales in having a single policy. This will ensure that staff who work across boundaries have a consistent standard to work to, hence strengthening the governance framework. A key driver during the process was the need to recognise that organisations needed to trust their staff.  |  |
| Who and how many (if known) may be affected by the policy?  | All staff within General Medical Practices, Pharmacies, Dentists and Optometrists who provide primary care services on behalf of NHS Wales  |  |
| What guidance have you used in the development of this service, policy etc?   | The policy is based on good practice and legal obligations as set out by the Information Commissioners Office and in the legislation. The policy has also been constructed from existing agreed principles and the corporate knowledge of its stakeholders.   |  |

## Equality Duties
