## **CHANGE NOTICE 03/05(W)**

**Reference:** CCN 03/2005(W)  
**Subject:** Change History for Changes Released in 2004  
**Effective Date:** 31 March 2005  
**Reason of Change:** To provide a facility whereby a user can trace the source of a change

### **Background:**

The NHS Wales Data Dictionary is an information repository to supply details of standards to be adopted for the data which is submitted from the Trusts to Health Solutions Wales. It also provides information for frequently used terms and shows the layouts of the mandated datasets.

Over time, this information is changed as a result of approved DSCNs which may originate from England, the Welsh Assembly Government or from NHS Wales. Currently there is no way of connecting the changed item to its approved DSCN.

This DSCN will provide a change history facility whereby a link will be made available to connect the changed data item or term to its associated change notification.

This change history sub-section will appear at the start of each description of the item or term. The associated DSCN will be set up as a hyperlink to the DSCN document.

It is planned that all data items and terms will have a Change History facility. This DSCN covers the creation of this new feature for DSCNs implemented during 2004.

### **Changes to the NHS Wales Data Dictionary:**

Appendix A shows a list of the relevant DSCNs along with the data items or terms affected.
