DATA STANDARDS CHANGE NOTICE

Introduction

The key aim to the standard is to reinstate a discharge reporting framework that will provide a level of validated information on par with those being reported pre-pandemic.

The implementation timetable is geared so that a new system will be in place and used by all health boards and social care services by January 2023.

The standard focuses on the introduction of a monthly validated data collection from Health Boards and Local Authority partners in respect of delayed discharges and transfers by region. There is much evidence on the association between appropriate timely discharge from hospital and patient improved outcomes. It is acknowledged that the standard will need to be revisited in future to ensure the availability of data nationally. However, by utilising the learning and recommendations described at point 6 it is the aim that we will introduce a reporting system that will:

- improved patient outcomes.
- provide useful validated data on discharge performance for planning and management purposes.
- provide an expanded reporting framework that can be used for monitoring purposes by officials and Ministers.
- be used as a foundation for developing action plans to translate data into meaningful action to improve services and patient flow as well as address any identified issues.
- Support financial and service strategy.
- benefit service providers and teams.

The NHS Wales Delivery Unit, in its GOAL 5 & 6 Transformation role, will support Welsh Government policy leads and NHS organisations in Wales with embedding the revised standard and improving compliance.

This work is aligned with the D2RA implementation, Optimal Patient Flow Framework, updated discharge advice.

Description of Change

There is currently no specific "Pathways of care Delays" dataset in the NHS Dictionary and the current monthly census follows the dataset.

Data Dictionary Version

The changes introduced by this DSCN will be published in version 4.17 of the NHS Wales Data Dictionary

Actions Required

The reporting census is currently underway currently for reporting of Pathways of Care Delays and the data items listed will be mandated nationally for reporting.

Local Health Boards / Trusts:

- Ensure that local processes and systems have been updated to comply with the standard set out in the Information Specification within this DSCN.

Digital Health Care Wales:

- Ensure that all national systems have been updated to comply with the standard set out in the Information Specification within this DSCN.

Appendix A: Table reflecting areas that are impacted as a result of this DSCN

The following table shows where there are changes to the scope and/or definitions of applicable data sets, data items, terms and other associated areas that are linked with the changes documented within this DSCN.

Each data definition type is listed in alphabetical order and is shown in the sequence in which it appears in this DSCN.

| Data Definition Type | Name | New/Retired/Changed | Page Number |
|-----------------------------|--|----------------------------|--------------------|
| Patient Level dataset | Pathways of Care Delays | New | |
| Data Item | Ward type at start of episode | Change | 16 |
| Data item | Reason | New | 12 |
