ADULT NUTRITIONAL RISK SCREENING TOOL (WAASP) GUIDANCE

Note: This nutritional risk screening tool does not supersede clinical judgement; refer to the Dietitian if you have any concerns regarding the patient's nutrition

Guidelines for completion

Complete assessment within 24 hours of admission to hospital
Record weight and height (if unable, ask the patient or relative to estimate)
Select the **highest** score that applies in **each** section **Add** the score of each section and record in the **total** box
Assess risk depending on the score and take appropriate action
Reassess weekly

SCORE and ACTION

0-2 LOW RISK

Repeat screening in one week or sooner if patient condition changes

3-6 MODERATE RISK

Assist with meal choice
Encourage eating and drinking and assist if required
Encourage milky drinks and snacks between meals
Monitor intake on the All Wales Food Record Chart
Complete/initiate local care plans – refer to local policy
Repeat screening in one week or sooner if patient condition changes

7+ HIGH RISK

Refer to the Dietitian & follow actions as per Moderate Risk
Monitor intake on the All Wales Food Record Chart
Complete/initiate local care plans – refer to local policy
Repeat screening in one week or sooner if patient condition changes

Referral to the Dietitian should be made irrespective of WAASP score if the patient:

Requires or is receiving any form of Enteral or Parenteral nutrition support Reports the use of prescribed nutritional supplements on admission Newly diagnosed therapeutic diet e.g. gluten free, Type 1 Diabetic

If the patient requires a therapeutic diet e.g. texture modified diet, potassium restriction, food allergy or intolerance—inform catering of the specific dietary need and refer to the Dietitian if the patient requires additional support.
