What is the Electronic Prescription Service?

The Electronic Prescription Service (EPS) is a new NHS Wales service that will help you, your pharmacy, your GP and the environment.

This free, easy and secure service lets your GP send your prescription electronically to us.

There is no need for a paper form and it will save time as your prescription will no longer need to be collected from the surgery.

With Lakeside Medical Centre, we are taking part in the first test in Wales to use the Electronic Prescription Service before it is rolled out gradually across Wales.

What are the benefits of the Electronic Prescription Service?

It will save time as your prescription won't need to be collected from the surgery.

You can help us test this exciting new service before it is used across Wales.

EPS will allow your prescription to be tracked, so we always know where it is.

You will help the environment by reducing our use of paper.

Sign up to the Electronic Prescription Service

Signing up is simple. Just let us know you would like to use this free service, and we'll do the rest. You do not need a computer, laptop or smartphone to sign up and your data will be safe and secure.
